

MICHIGAN STATE UNIVERSITY

EIT ACCESSIBILITY ACKNOWLEDGEMENT

The University is committed to providing an accessible, usable, and integrated experience for all people. To that end, it is important that electronic information technology (EIT) comply with the standards set forth in the Web Accessibility Policy (i) WCAG 2.0 AA for Web-based products; and (ii) section 508 of the Rehabilitation Act of 1973, for non-web-based products. You can view the University's Web Accessibility Policy, much of which translates to other electronic information in addition to the web here:
http://webaccess.msu.edu/Policy_and_Guidelines/web-accessibility-policy.html

Your purchase of _____ may not be in compliance with the above standards.

If you would like to proceed with the purchase, this document serves as confirmation that you understand the policy and will, if applicable, develop and file internally an Equally Effective Alternative Access Plan. The plan should:

- identify the accommodation that will be provided to individuals with disabilities;
- identify the individual responsible for providing the alternative/accommodation;
- describe how the alternative access will be provided;
- outline any kind of arrangement and timeline with the manufacturer or developer of the product to make their product accessible.
